

The new multi-motor electric Code Sail furler : «Small but strong» !

Further to the successful developments made for the electric furlers, the Wichard Group teams have adapted the multi-motor concept to Code Sails up to 140 m².

The result is a concentrate of energy in a compact, light and particularly efficient furler: 45 seconds to effortlessly furl a 140 m² Code Sail !

> **Simple installation:** the electric furler is delivered with a complete kit (relay box, circuit breaker, wire, deck plugging, storage bag, protective cover) and benefits from a dedicated, simple and waterproof electrical connection.

> **Easy to set up:** thanks to a snap shackle at the bottom, a fast tack attachment as well as a protection cover with handle

> **Compact and light:** the size is reduced to allow an easy switch from manual to electric system, but also to save weight and make the operation handy.

> **Fast and comfortable to use:** 45 seconds for furling a 140 m² Code sail (85 rpm* for the 12V version) just by pressing a button! Handled from the cockpit in complete safety.
(* -20% rpm / under load)

> **Contained power consumption:** 20-25 Ah under load.

> **Widely tested :** numerous mechanical and electrical endurance tests in workshop and in real-life conditions.
For Code Zero up to 140 M²

> **Options:** wired or radio control version.

> **Compatible :** with our Flying sails accessories : Asymmetrical Spinnaker, Snatch Blocks,....

> **Indicative price :** from € 4165 ex VAT (motorization kit)
